

A Level Geography

We follow the AQA A Level specification which encourages links to be made between the human and physical courses.

The link to the specification is:

<http://www.aqa.org.uk/subjects/geography/as-and-a-level/geography-7037>

The Geography department would like to you spent the summer delving into current events and breaking news stories to investigate the links between human and physical geography. You are required to read around topics to fully understand causes and consequences. Think about recent events such as the collapse of Carillion – why did this happen? What is the link with Qatar? What are the social and economic impacts on the UK?

Think about the World Cup – how has this event impacted Russia and countries around the world?

Think about the weather we are experiencing at the moment...why is this happening? What are the impacts of this on people, the economy and the environment? Has the weather caused problems with the supply of certain foods? What are the impacts of this?

Physical Geography	Human Geography
Rocks and Minerals	Population
Landforms	Settlements
Soils	Economic Activities
Animals	Transportation
Plants	Recreational Activities
Water	Religion
Atmosphere	Political Systems
Rivers & other water bodies	Social Traditions
Environment	Human Migration
Climate and Weather	Agricultural Systems
Oceans	Urban Systems

How you present this information is completely up to you – it can annotated on a map of the world; written as an article; a storyboard on the internet... as long as your research is factual and is evidenced.

You are required to research 5 different news stories.
